2. **Averages/Handicap:**

a. Handicap will be figured at 90% of 220 with a maximum per game handicap of 54 pins for D1 and 94 pins for D2.

b. Averages used for TVMT will be based on the following:

i. Bowlers entering TVMT will use their TVMT average from last year.

ii. Those not having a TVMT book average will use their highest house average of **12 games** or more from the end of the previous month.

iii. Bowlers not having a TVMT book average or current house average of **12 games** or more will use their highest league average at the end of the previous season. (Division placement may adjust until a TVMT average is established.)

iv. TVMT average after **9 games** will be used from that point on.

1. TVMT averages are calculated using all games bowled during scratch or handicap tournaments

2. Scratch and Handicap averages are separate.

v. If current league average of **12 games** or more is over 20 pins higher than last year's TVMT or Book average, the bowler may be re-rated to their current league average at the discretion of the tournament director.

vi. Any bowler not having an average meeting the above criteria will use an entering average of 220.

3. **Participation:**

a. Bowler may participate in both the Scratch Tournament and the Handicap Tournament as defined by the division breakdown by average.

b. Average will determine a bowler's division (see 3. Averages/Handicap).

The bowler in the first position will bowl against the bowler in the eighth position; the bowler in the second position will bowl against the bowler in the seventh positions, etc.

 - i. Handicap tournaments only: 1/10th of the bowlers' handicap will be used for both the 9th and 10th frame. All fractions of handicap will be rounded down. For example, if 1/10th of the bowler's handicap is 8.7 the handicap will be 8 pins per frame.
